## About IPCC

The International Paint, Resin, Coatings, Composites and Plating Industries fair "IPCC" with around 288 direct exhibitors who are representing over 1950 companies from 21 countries in covered area of 27,622 square meter is by far the biggest coating exhibition in the Middle East.

IPCC as the leading coating exhibition in the region has been fruitfully held by Banian Omid Co. for the past 22 years and it has always benefited from cooperation with private and governmental organizations, associations and NGOs.

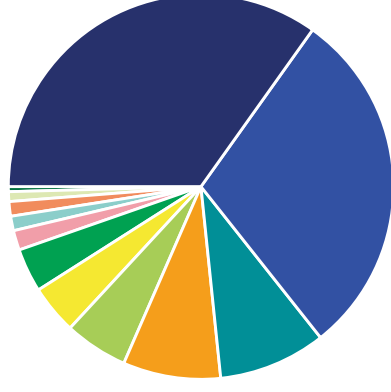

Taking IPCC's statistics into account, it has shown a very steady and gradual rise in its first 12 editions. However in 2013 those numbers have escalated dramatically, not only the number of local exhibitors has almost doubled, but it has also recorded 237% increase in number of foreign participants. From 2013 to 2022 number of exhibitors has been the same due to the limited exhibition space but number of visitors and supplementary event like B2B meeting and conferences has risen every year. 1,648,000km<sup>2</sup> area, population around 80,000,000, extraordinary geopolitics situation and its rich resources contribute Iran to become one of the most suitable market for Coating industries.

## Iran's core competencies in coating industries

Iran is considered as an emerging market with a steady rise in number of local industries specially in coating related industries which is an essential part of almost every production. This provides considerable amount of demand for coatings for local market.

Iran has one of the largest oil resources in the world, which contribute to fast and unlimited access to raw material. Therefore not only the price of raw material would be highly competitive, but also producers would save a lot on transportation and logistics cost.

Iran is located in the heart of middle east and borders the Caspian Sea, Persian Gulf, and Gulf of Oman. It also shares border with Afghanistan, Armenia, Azerbaijan, Iraq, Pakistan, Turkey and Turkmenistan, therefore production in this area would be highly accessible for surrounding countries and to the world.

This huge consumer market has been a heaven for producers and service providers.

Different products and service with various qualities and prices have managed to obtain considerable market share.

### **Banian Omid Co. Biography**

Organizing an international exhibition is a highly specialized activity that requires knowledge, experience and appropriate technology. We are happy that Banian Omid Company, with more than 25 years of activity in this industry, has made it possible to learn the demands and needs of customers, to be aware of the latest knowledge, to access the best human resources and to use the most suitable technical facilities to be able to provide specialized services to its customers. This company was founded in the year 2001 by a group who had years of experience in various fields of the exhibition industry. They have managed to hold 22 international exhibitions during a two-year period at the Milad Exhibition Management and Planning Center (located in Iran International Exhibitions Center in Tehran). This company is the only company in Iran that has managed to hold this number of exhibitions during a 2 years period. This group is the first and undoubtedly the most extensive Iranian company in the field of domestic and international exhibition services. Banian Omid Co. has always tried to be able to handle extensive and different matters in the field of exhibition services through centralized and dynamic groups under macro management system.
